INFORMATION AND TERMINOLOGIES

Cookies are small files that web pages, online stores, intranets, online platforms or similar, stored in the user's browser that visits them and are necessary to contribute to the Web browsing innumerable advantages in the provision of interactive services.

The following information on the possible types of cookies helps to better understand the functions that make it possible:

Session cookies:

They are temporary cookies that remain in the space of cookies of your computer until you close the browser, so none is recorded on the user's disk. The information obtained by means of these cookies serves to make possible the operational management with each one of the users that is accessing the web simultaneously.

Persistent cookies:

They are cookies that remain stored in the space of cookies of your computer once closed the browser, and that you will revisit that web page the next time you access it to remember information that facilitates navigation (directly access the service without having to make the login process) or the provision of a commercial service (offer those products or services related to previous visits).

The cookies exchanged when browsing a web page can be:

Cookies of origin or own:

They are cookies generated by the website that is being visited.

Third party cookies:

They are cookies that are received when browsing that web page, but that have been generated by a third service that is hosted in it. An example can be the cookie used by an ad or advertising banner that is on the website that we visit. Another may be the cookie used by a visitor counter hired by the website we visited.

The cookies can be used to:

Technical purposes:

They are also called "strictly necessary". They allow the user to navigate through a web page, platform or application and the use of the different options or services in it exist, for example, to control traffic and data communication, identify the session, access restricted access parts, remember the elements that make up an order, perform the process of purchase of an order, make the application for registration or participation in an event, use elements security during navigation, store contents for the broadcasting of videos or sound or share content through social networks.

Personalization:

They make it possible for each user to configure aspects such as the language in which he wishes to see the web page, visualization formats, etc.

Analysis or performance:

They allow to measure the number of visits and navigation criteria of different areas of the web, application or platform and allows us to create navigation profiles of the users of these sites, applications and platforms, with the aim of introducing improvements based on the analysis of the usage data collected do the users of the service.

Advertising:

They allow implementing efficiency parameters in the advertising offered on the web pages.

Behavioral advertising:

They allow the implementation of e-science parameters in the advertising offered on web pages, based on information about the behavior of users obtained through the continuous observation of your browsing habits, which allows you to develop a specific profile to show advertising in function of it.
